SUMMARY

Human-computer Interaction having research interests across design co-creativity, human-AI interactions and machine learning. I aim to investigate new methods/tools to support AI literacy through explicit (critical/creative thinking, education) and implicit methods (visualisation, interaction design).

WORK EXPERIENCE

Project Scientist, AI Center of Excellence IIT Hyderabad Jul 2024 - present

Building digital experiences and ML models from scratch for an AI-powered urban governance platform and waste management, assisting government bodies in collaboration with an NGO. A project under the Make AI in India initiative of the nation-wide IndiaAI mission.

User experience Intern, Optum UHG May 2023 - Jul 2024

Implemented a human-centred approach case study on medication adherence and improved well-being among Thyroid patients. Developed digital and tangible prototypes of proposed interventions.

Senior Data Engineer, LTIMindtree Jul 2021 - Jul 2022

Development of data engineering pipelines and cloud infrastructure, managing data warehousing operations in a production environment.

Machine Learning Intern, Reliance Petrochemicals May 2019 - Jul 2019

Optimisation of cash flow forecasting algorithm with Machine Learning. Leveraged R(Programming language), statistical data analysis/visualisation tools.

EDUCATION

Indian Institute of Technology, Hyderabad 2022 - 2024

Master of Design (Interaction design) (GPA: 9.62/10.0), Institute Silver medalist
Research interests: human-AI interaction, design creativity, immersive reality

University of Mumbai 2017 - 2021

Bachelor of Engineering (Computer Engineering) (GPA: 8.85/10.0)

AWARDS & ACHIEVEMENTS

- 2024 **Institute Silver medal for highest CGPA in MDes'24**, IIT Hyderabad
Special mention at Design Research Methodology workshop, IIT Guwahati
- 2023 **Academic Excellence Award**, 15th Foundation day IIT Hyderabad
- 2022 **All India Rank 140 (General)**, CEED 2022
- 2021 **Best graduation project in B.E Computer Engineering**, University of Mumbai

PROJECTS

Project Aiswaryam

Jul 2024 – Dec 2024

Led the development of AI-driven digital experiences - geospatial dashboards, CAVE VR interactions, LLM-driven natural language queries to help policymakers and government officials make data-driven decisions. Represented complex machine-learned capabilities through usable interfaces. [Website](#)

Analogical LLM Ideation Agent

Jan 2024 – Jun 2024

Proposed a conceptual framework employing an analogical thinking process and leveraging LLMs for creative ideation tasks. Developed a creative support tool promoting human-AI collaboration. Concluded with insights on benchmarking of LLMs in subjective creative tasks. [Website](#)

Ancient Egypt in Augmented Reality

Jun 2023 – Dec 2024

Built an augmented reality immersive learning experience showcasing the wonders of Egypt through an interactive book published along with colleagues at IIT Hyderabad. [Amazon](#)

PUBLICATIONS

Published

Kokate, Rutvik et al. (2025). “Leveraging LLMs for Design Ideation: An AI Tool to Assist Creativity”. In: *Responsible and Resilient Design for Society, Volume 4*. Ed. by Amaresh Chakrabarti et al. Singapore: Springer Nature Singapore, pp. 579–589. ISBN: 978-981-96-5495-6.

In-Progress

Kokate, Rutvik and Prasad Onkar (2025). “Analogical reasoning with large language models: A co-creative framework and benchmarking of LLMs in design ideation”. In: *Design Science Journal*.

TEACHING EXPERIENCE

Teaching Assistant, IIT Hyderabad

Sep 2025

Conducted a course module on Game design.

Visiting faculty, NIFT Hyderabad

Feb 2025 - Jun 2025

Co-conducted Digital Product design course and conducted final jury evaluations.

Teaching Assistant, IIT Hyderabad

Nov 2024

Conducted a course module on AI in Design and AR/VR.

Visiting Faculty, Woxsen University

Mar 2023

Conducted a course/workshop on “Introduction to Unreal Engine for AR/VR”

ACADEMIC SERVICE

Student Volunteer, ICoRD 2025

Oct 2024 - Jan 2025

Assisted in handling 900 conference registrations. Developed and operated a participant management system helpful in logistical planning, crowd management, events etc.

Students portfolio page, IIT Hyderabad

Nov 2024

Developed a portfolio page for the registered students in the Department of Design, IITH. [Website](#)

ACTIVITIES

- Rural development outreach**

Aug 2022 - Jun 2024

Teaching basic-level science and math to the local zilla parishad schools, collecting data on villagers' lifestyles and challenges, and conducting awareness drives.
- Institute football team**

Aug 2022 - Jun 2024

Led the football team as a captain. Learned team management and leadership, quick thinking and practical decision making, understanding peer behaviour and communication.

SKILLS

- Programming languages**

Python, JavaScript, R, C/C++, Java
- Software**

Unity, Unreal Engine, Blender, Android Studio, IBM SPSS
- Hard skills**

Machine Learning, Data visualization & engineering, Full-stack web development, Cloud infrastructure and networking, Software engineering, Statistical analysis, Design thinking and Research methodology, Ethnographic research, Prototyping
- Soft skills**

Teamwork, Leadership, Mentorship, Creative & critical thinking, Public speaking
